An easy method for comprehensive posture support.

Chiropractic care condensed into a compact body.
Comfort your lower back and shoulders over long hours of deskwork, airplane travel or even when enjoying a movie.
Style Simple is small, but it's a big step toward a new you.

A comprehensive posture support based on chiropractic theory.

Point 1 Orthostatic Pelvic Tilt

By tilting the angle of the seat base slightly forward, you can maintain the body's forward-tilting center of balance. This leads to the ideal posture, with an upright pelvis.

Point 2 Curved Body-traced Surface

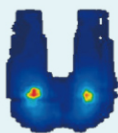

The curves that perfectly fit with the body avoiding putting pressure on the muscles as well as prevent lateral shifting of the pelvis and restrict rotation of the hip joints.

Correct posture equally distributes pressure and reduces the burden on your body.

By maintaining the proper physical position, Style Simple relieves the body's pressure which tends to concentrate in a very small area.

 *Conditions: A comparison of pressure distribution on the backrest/seat while sitting with/without Style Simple by using body pressure dispersion measuring equipment. (MTG test results)
 *Results may vary depending on the individual.

Pelvic support helps reduce the burden to your lower back.

Pelvic misalignment can cause strain to the spine, making it difficult for posture stabilizing inner muscles to work properly. That's why it's important to reduce the burden on the back and shoulders by stabilizing the pelvis and guiding the body to a proper sitting posture.
